Describe Two Gangs Engaged in Wholesale Plots With Dynamite.

Most of the bomb outrages of 1913 were explained yesterday in General Sessions before Judge Rosalsky by two men, each only 24 years old, who planted and set off between them about 130 packages of dynamite.

Alfred Lehman, called Schmitty, and Rocco Picciarello, known to the gangs as Zump, were the men employed to blow up persons who didn't pay money de

They told their cold blooded stories of arson, thievery, thuggery and bomb planting at the trial of Angelino Sylvestro, accused of helping in an attempt to explode a bomb at 170 East Houston street on the night of August 31 last. It was bomb No. 110 of the series of 1913.

#### Girl Cause of Leader's Wrath.

This particular bomb was set because of a girl, Nellie Pecorara, whom Joe Fay gang leader, wanted and couldn't get Fay (his name is Giuseppe Ferrara) wasn't in good standing with the girl's uncle. Carmelo Calderone of 170 East Houston street, so a bomb was placed outside Calderone's door. It was detected and soaked in water before it exploded.

The story of Schmitty and Zump was that they, with Sylvestro, who is on trial, and Burkie (Anthony Savaytis) were "mechanics" employed by two gangs. One gang was headed by Petrino (Pietro

"I believe," he went on to say, "that the grang leaders knew that Schmitty, Zump, Sylvestro and Burkle were working for the other crowd.

When the gang men had a job they wanted done, said Schmitty and Zump, they usually telephoned to one of the mechanics. A date was set and the mechanic met one of the gang leaders knew that Schmitty. the mechanic had to do was to go to the right place, set the bomb, light the fuse and get away quickly. The dynamite sticks were always wrapped in a piece of newspaper for convenient handling

> "I'm German-American and Burkle is Polish-American. We keep cool, plant our sticks after wrapping them in newspaper, light the fuse and get away fast."

## No Regard for Human Life.

"And you had absolutely no regard for the lives you might destroy?" asked James E. Brande, counsel for Sylvestro.
"No," responded Schmitty, indifferently.
He went on to tell about the dynamite
taken to 170 East Houston street, a typi-

cal case except, perhaps, in the fact that the thing was discovered before an explo-sion. Zump, following Schmitty on the

stand, told the same story.

Bedutz and Fay named places where bombs were to be set frequently over the telephone, Schmitty and Zump testified The pay of a "mechanic" was not large Schmitty and Zump averaged about \$30 aplece on dynamite jobs. This money they were likely to spend "sporting around" and to eke out a living they practised all kinds of theft.

They stole many horses and wagons, they performed arson jobs for a con-sideration, they "stuck up" persons and places when they thought they might get a little money. The two men thought that Bedutz made the bombs in a saloon at Houston and Elizabeth streets. Some of the dynamite was planted on strike

The bomb used consisted usually of two sticks of dynamite wrapped in a news-paper, with two fuses and two fulminate of mercury caps. Its descriptions of mercury caps. Its destructive power in a small hallway was considerable. It

The Japanese commander in reply thanked the Mexican officials and people for the very cordial reception which had been accorded himself and the other officers everywhere in the country, particularly at Guadalajara, where, he said, they received an ovation.

He concluded by saying, "We will now drink to my own country," and in a loud voice gave the order for his officers to rise, which they did, and at the same time shouted "banzat!" in deafening

This bombast was tremendously applauded by his fellow officers. One of the Japanese officers carried in a most ostentatious manner a shattered sword which he told every one belonged to one of his ancestors who perished in the naval fight with the Russian Admiral Rojestvensky. The sword, he said, was broken by a shell in the great naval battle.

When he was mistakenly addressed a 'vice-admiral" the captain of the Itzumo exclaimed: "Perish the thought! I would not leave my ship that I so love much to be an Admiral."

Altogether the Japanese officers in pressed the Mexicans at the banquet as oastful and bombastic, with great affect tion for military precision. All talk in very loud voices.
